

At Grupo PIASA, we uphold a firm commitment to environmental protection and the responsible management of natural resources. Our Environmental Policy establishes the framework that guides our decisions and operations to prevent, mitigate, and control the environmental impacts associated with our activities, integrating sustainability criteria into every process and fostering innovation to achieve superior environmental performance.

We operate in alignment with international standards such as **ISO 14001 and the Sustainable Development Goals (SDGs)**, adopting practices that promote operational efficiency, emissions reduction, circular economy principles, and biodiversity conservation. Our commitment is to comply with applicable environmental legislation and to exceed requirements through continuous improvement.

As part of our corporate responsibility, we focus our efforts on key areas:

- **Water Management:** Optimization of water consumption, protection of water sources, and proper wastewater treatment.
- **Climate Change:** Reduction of climate-related risks, promotion of resilient practices, and participation in local and global initiatives.
- **Emissions Control:** Reduction of greenhouse gas emissions through renewable energy, clean technologies, and energy efficiency.
- **Waste Management:** Advancement of circular economy practices and reduction of solid waste.
- **Biodiversity Conservation:** Promotion of the protection of local flora and fauna, sustainable agricultural practices, and ecosystem restoration programs.

At Grupo PIASA, we are committed to building a sustainable future, recognizing that environmental protection is essential to community well-being, sector development, and the continuity of our business. This commitment guides our actions today to ensure a healthy environment for future generations.
